

Illinois Solar for All: Community Solar Opportunities for Owners and Renters

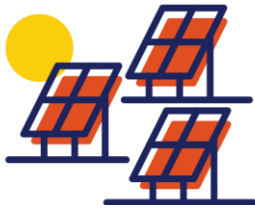

LAST UPDATED: JULY 2024

Are you a renter? Do you own a home that is not a good fit for solar panels? You may be a great candidate for Illinois Solar for All: Community Solar!

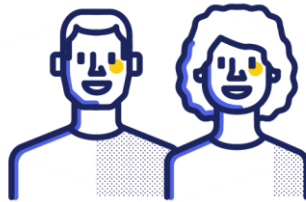

Illinois Solar for All (ILSFA) is a state program that brings the benefits of solar energy to income-eligible households, non-profit organizations, and public facilities. Subscribing to a community solar project through ILSFA allows you to save money on electricity costs and support clean energy production without having to install solar panels on your property.

Here's How Community Solar Works

1. Solar panels are located at a community solar farm in your utility territory.

2. If you pay an electricity bill, you can subscribe to this community solar project.

3. You will receive credits on your electricity bill for your portion of the project.

The community solar projects listed on the next two pages are currently recruiting new subscribers. Participants must be income-eligible, receive an electricity bill, and live in the utility territory where the project is installed (Ameren or ComEd).

Consolidated Single Billing

Prior to the 2023-2024 Program Year, utilities provided two separate bills for community solar subscribers, which when combined, resulted in overall savings. Community solar projects approved in the 2023-2024 Program Year and beyond are required to utilize a consolidated, single-billing option. To simplify the billing process and improve participant experience, community solar projects approved prior to the 2023-2024 Program Year may also utilize the utility consolidated, single billing option.

Other Solar Opportunities

Illinois Solar for All brings affordable solar energy installations to income-eligible households through the Illinois Solar for All: Residential Solar sub-program. Households that do not qualify for the Residential Solar or Community Solar sub-programs may qualify for solar incentives through [Illinois Shines](#), another state program.

Current Community Solar Offers

LAST UPDATED: JULY 2024

Use the contact information below to reach out to an approved solar company in your utility area and learn more about participation availability.

Ameren Territory
